New Names

Sometimes plants and animals have fun names which describe them. Buddleias are called butterfly bushes because many butterflies land on the flowers to drink the nectar.

You can make up fun names too and then it does not matter if you do not know the usual name of a plant or animal in your garden.

...Bluebell...

Find an interesting plant or animal in the garden.

Give the plant or animal a new name - something to do with what is interesting about it.

Share your new name with a friend and introduce them to your animal or plant.

...Daddy long legs...
